Sam Guindi – Bureau Veritas Product Certification Manager

Product Certificate

DriStud RU22, RU24, FRU36 & FRU38 Roof Underlays

3. Description of Building Method or Product

Name of the product or method in Aotearoa New Zealand, including any brand names used. Description of what it is and the components that make up any system and its physical attributes including the materials and make-up of the product, where applicable. Matters that should be taken into account in the use or application of the building method or product can be found in Item 6. Conditions and I mitations of Use. Continuation of description can be found in Item 10 – Supporting Information about Description. [Delete if not applicable]. The building method's or building product's catalogue or model identification number or numbers or other unique identifiers that might be used to identify the building product or building method.

DriStud RU22 and DriStud RU24 are non-fire retardant, synthetic tri-laminate water resistant, absorbent and vapour permeable underlays. DriStud RU22 is grey-faced and DriStud RU24 is black-faced. DriStud FRU36 and DriStud FRU38 are fire-retardent synthetic tri-laminate water resistant, absorbent and vapour permeable underlays. DriStud FRU36 and DriStud FRU38 are both white-faced.

All products are branded with DriStud branding and the specific product name.

4. Intended use of Building Method or Product

Intended use of the building method or product as described in the product manual and other instructional materials. A statement of the function or purpose of the building method or product. Continuation of intended use can be found in item 11 – Supporting Information about Intended use. [Delete if not applicable]

DriStud RU22 and RU24 are non-fire retardant, self-supporting, roof underlays.

DrStud FRU36 & FRU38 are fire retardant, self-supporting roof underlays.

5. New Zealand Building Code Provisions

The performance clauses of the New Zealand Building Code that are relevant to the intended use and with which the building method or product complies or contributes to (where used as part of a system).

How the building method or product complies or contributes can be found in item 8. Basis for Certification. Any qualifications on the extent of that compliance can be found in item 6. Conditions and limitations of use

Clause B2 Durability: B2.3.1 (b), B2.3.2 (a)

Clause C3 Fire affecting areas beyond the fire source: C3.4 (c) (FRU36 and FRU38 only)

Clause E2 External moisture: E2.3.1 (contributes to), E2.3.2 (contributes to); E2.3.5 (contributes to), E2.3.6 (contributes to); E2.3.7

Clause F2 Hazardous building materials: F2.3.1

This certificate is issued by an independent certification body accredited by JAS-ANZ, the product certification body appointed by the Chief Executive of the Ministry of Business, Innovation and Employment under the Building Act 2004. This certificate may only be reproduced in its entirety. It is advised to check that this certificate is currently valid and not withdrawn or suspended by referring to the Register of Product Certificates on the Building Performance website https://www.building.govt.nz.

Version: 1

Original issue date: 31 October 2019 Version date: 13 November 2023

Product Certificate

DriStud RU22, RU24, FRU36 & FRU38 Roof Underlays

6. Conditions and Limitations of Use

The building method or product's use is to be in accordance with the installation instructions and requirements against which the building method or product was assessed

Conditions or limitations of conformity for the performance requirements the building method or product is compliant with, including any requirements for people with the qualifications and skills to install or use the building method or product, any known or demonstrated situations where the building method or product should not be used. A statement as to whether there are any matters that should be taken into account in the use or application of the building product or building method and, if so, what those matters are.

- 1. DriStud RU22, DriStud RU24, DriStud FRU36, & DriStud FRU38 Roof Underlays are certified for use as a roof underlay:
 - a) on buildings situated in wind zones up to and including Extra High (as set out in NZS3604) with a minimum roof pitch of 3°,
 - under masonry tiles, terracotta tiles, metal tiles, profiled metal claddings, slate and composite panels,
 - c) installed horizontally or vertically (subject to Condition 3 below)
 - d) installed on timber or steel roof framing
- 2. DriStud FRU36, & DriStud FRU38 Roof Underlays are certified for use as a roof underlay and air barrier in locations exposed to view in an occupied space.
- 3. DriStud RU22, DriStud RU24, DriStud FRU36, & DriStud FRU38 Roof Underlays:
 - a) shall be installed in accordance with the DriStud RU24 & RU22 Installation Guide Rev 4.0 (August 2023), the DriStud FRU36 Installation Guide Rev 4.0, (March 2019) and the DriStud FRU38 Installation Guide Rev 3.0 (March 2019) respectively (available at www.drispace.co.nz
 - b) shall be supported by corrosion resistant mesh or alternative e.g. plastic strapping where:
 - i. the span exceeds 1200mm or
 - i. the underlay is installed vertically where the roof pitch is less than or equal to 10°, or
 - c) may be installed horizontally (with upper layers overlapping the lower layers) without support, for roof pitches 3° or greater, provided the underlay is installed flat and taut,
 - d) separated from fireplaces, heating appliances, flues and chimneys in accordance with the requirements of NZBC Acceptable Solutions C/AS1 and C/AS2, Paragraph 7.5.9 for the protection of combustible materials, and
 - e) shall be protected from direct sunlight within 7 days of installation (21 days for FRU38).

7. Health and Safety Information

Health, safety, and well-being declarations associated with installation, maintenance, and use of the building method or product, and their specific editions and dates necessary to ensure the performance requirements of clauses F1 to F9 of the Building Code can be met.

The compliance with any manufacturer's installation instructions, maintenance, OH & S Statements, MSDS's and other Health and Safety declarations will provide the necessary Health and Safety Information pertaining to the product.

This certificate is issued by an independent certification body accredited by JAS-ANZ, the product certification body appointed by the Chief Executive of the Ministry of Business, Innovation and Employment under the Building Act 2004. This certificate may only be reproduced in its entirety. It is advised to check that this certificate is currently valid and not withdrawn or suspended by referring to the Register of Product Certificates on the Building Performance website http://www.building.govt.nz.

Product Certificate

DriStud RU22, RU24, FRU36 & FRU38 Roof Underlays

8. Basis for Certification

How the performance requirements in the Building Code were met for each of the provisions. Where used as part of a system, the specific contribution to compliance

B2 Durability - By comparison with Acceptable Solution E2/AS1 and NZS2295:2006; and Verification Method B2/VM1 C3 Fire affecting areas beyond the fire source - By testing and comparison with Acceptable Solutions C/AS1 and C/AS2

E2 External moisture - By testing and comparison with Acceptable Solution E2/AS1 and NZS2295:2006

F2 Hazardous building materials - By comparison with the requirements of performance clause F2.3.1

9. Supporting Documentation for Certification

Reference to any acceptable solutions, verification methods, New Zealand Standards, or other compliance pathways referenced against each individual performance requirement the building method or product is compliant with, and their specific version and date. Reference to documents describing tests and evaluations and any other documents relied on for certification or used to prove compliance, including their full title, specific version and date.

- Acceptable Solutions and Verification Methods for New Zealand Building Code Clause B2 Durability Second edition (Amendment 12), 28 November 2019
- 2. C/AS2 Acceptable Solution for Buildings other than Risk Group SH for New Zealand Building Code Clauses C1-C6 Protection from Fire First edition (Amendment 2), 5 November 2020
- 3. C/VM1 Verification Method for Solid Fuel Appliances C/AS1 Acceptable Solution for Buildings with Sleeping (residential) and Outbuildings (Risk Group SH) For New Zealand Building Code Clauses C1-C6 Protection from Fire (Amendment 5), 5 November 2020
- 4. Verification Methods E2/VM1 and Acceptable Solutions E2/AS1, E2/AS2 and E2/AS3 for New Zealand Building Code Clause E2 External Moisture Third edition (Amendment 10), 5 November 2020
- 5. NZS 2295 2295:2006 Pliable, permeable building underlays
- 6. AWTA Test Report No. 21-000283 Properties of RU24-NP, 24 March 2021
